Release Notice: SACPA Reporting Information System Version 3.0

Release Date: April 2, 2002

On April 2, 2002, the California Department of Alcohol and Drug Programs (ADP) will install SACPA Reporting Information System (SRIS) Version 3.0. This upgrade will allow counties to submit all parts of their County Plans using SRIS. The changes include the ability for counties to upload the plan description and to report their planned spending for SATTA (SB 223).

SACPA Reporting Information System Version 3.0 includes the following changes:

- SATTA (SB 223) reporting requirements have been added to the County Plan. This includes changes to the Entity, Service/Activity and Client Projections pages of the County Plan.
- The plan description section of the county plan has been added to the County Plan. This includes a new web form that encompasses the questions from Part I of the County Plan Template and a method of file upload for submitting the County Plan description (Part II of the County Plan Template).
- The split between direct and administrative planned spending has been removed for the service/activity portion of County Plan. Counties will report total planned spending (direct plus administrative).
- The look and function of the pages and forms of SRIS have been modified to meet the Governor's web page standards.
- The automation help desk phone number has been added to SRIS error messages.
- Inquiry only access types have been added for county and ADP users.

For questions on how to use or access the SACPA Reporting Information System, please call the ADP Automation Help Desk at (877) 517-3329 or email SACPA@adp.state.ca.us.
